SUMMARY

Computer Science graduate specializing in Python, TypeScript, and cloud-native GenAI application development. Experienced building and deploying scalable serverless systems on AWS, integrating large language model (LLM) toolchains into production workflows, and driving quality through rigorous testing and observability. Strong communicator who thrives in fast-paced, high-ownership engineering environments.

EDUCATION

University of Washington

Seattle, WA

B.S. in Computer Science | GPA: 3.80 / 4.00

Sep 2021 - Jun 2025

- * Relevant coursework: Machine Learning Systems, Distributed Computing, Cloud-Native Applications, Advanced Algorithms, Human-Computer Interaction, Systems Programming
- * Mary Gates Research Scholar - developed ML inference pipeline as independent research
- * President, UW Women in Computing (WICS) - grew chapter membership by 40%

TECHNICAL SKILLS

Languages: Python (proficient), TypeScript, Java, Go, SQL, Bash

AWS Services: Lambda, Bedrock, S3, DynamoDB, SQS, SNS, Step Functions, CloudWatch, IAM, ECS, Cognito

AI / ML: Amazon Bedrock (Claude, Titan), LangChain, OpenAI API, RAG pipelines, prompt engineering

Frameworks: FastAPI, Express.js, Next.js, React, pytest, Jest

DevOps / CI-CD: GitHub Actions, AWS CDK, Docker, AWS SAM, Datadog, Grafana, Terraform

Practices: Serverless, event-driven design, REST & GraphQL APIs, BDD, TDD, Agile

Tools: VS Code, Git, Postman, Notion, Linear, Jira, Confluence

EXPERIENCE

Microsoft - Software Engineering Intern

Redmond, WA

Azure AI Platform - Conversational AI Team

May 2024 - Aug 2024

- * Built a TypeScript/Node.js orchestration layer for multi-turn LLM chat sessions using Azure OpenAI; reduced average response latency by 210 ms via prompt caching.
- * Designed a streaming response gateway (Server-Sent Events) that cut time-to-first-token by 38% across 12 downstream consumer services.
- * Wrote 200+ Jest unit and integration tests; integrated into Azure DevOps pipeline with mandatory coverage gate at 85%.
- * Collaborated with PM, UX researcher, and 3 engineers in Scrum; delivered all sprint commitments on time across 6 two-week sprints.
- * Authored design doc reviewed by principal engineers; shipped feature to 4,000 preview customers in the final week of the internship.

Data Connectivity & Cloud Integrations Team

Jun 2023 - Aug 2023

- * Developed a Python FastAPI microservice exposing REST endpoints for Tableau's AWS S3 data-connector; reduced data-load times by 27% for Parquet-formatted sources.
- * Implemented OAuth 2.0 + PKCE authentication flow for connector; zero findings in internal red-team security review.
- * Contributed 3 pull requests to open-source connector SDK; merged after senior engineer code review.

Tableau (Sa

PROJECTS

DocuMind - Serverless RAG Document Q&A Platform

github.com/priya-nair-dev/documind

- * Architected end-to-end RAG pipeline: S3 upload -> Lambda (Python) text extraction -> Bedrock Titan embeddings -> DynamoDB vector index -> Claude 3 Sonnet generation.
 - * Achieved sub-800 ms end-to-end query latency for PDFs up to 200 pages via chunked embedding with sliding-window overlap strategy.
 - * Deployed with AWS CDK; integrated CloudWatch Insights dashboards and SNS alerts for Lambda cold-start anomalies; maintained 99.9% uptime over 3 months.
 - * Implemented streaming response (SSE) in Next.js frontend; positive feedback from 15 beta users during pilot.
- PipelineGu
- * Built a Python service that ingests GitHub Actions workflow telemetry via SQS, trains an Isolation Forest model on build-time/failure patterns, and flags anomalous runs.
 - * Reduced false-positive alert rate by 55% vs. threshold-based alerting across 3 open-source repositories used as benchmark test cases.
 - * Packaged as Docker container on AWS ECS Fargate; auto-scales on SQS queue depth via AWS Application Auto Scaling.

CERTIFICATIONS & AWARDS

- * AWS Certified Solutions Architect - Associate (SAA-C03) | Issued Mar 2025
- * AWS Certified AI Practitioner (AIF-C01) | Issued Nov 2024
- * Mary Gates Research Scholarship Recipient - University of Washington, 2024
- * Best Use of AI/ML - HackUW 2023 Hackathon (DocuMind prototype)
